

VSG

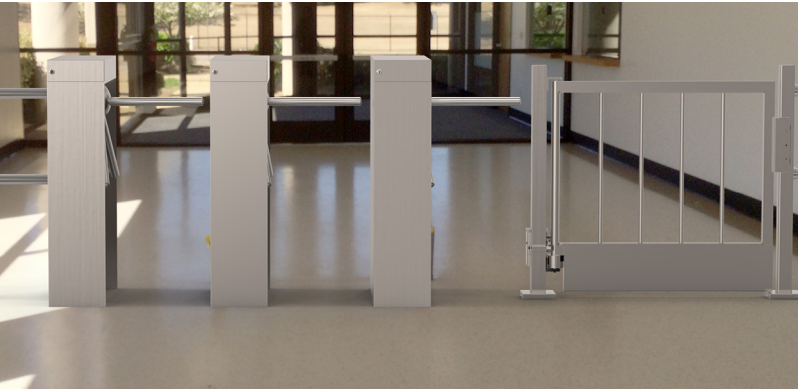

Pedestrian Security Gate

The VSG is a self-closing gate that opens in a single direction and provides a wide opening for passage and delivery access. The gate is ideal companion to our railing and / or waist high and optical turnstiles.

Product Features

- Non-locking and electric lock versions available
- Wide opening for patron passage and delivery access
- Durable hydraulic closure
- Integrates easily to access control systems

Available Models

- VSG No locking hardware
- VSGX Electro-magnetic lock included

Common Applications

- Employee / Visitor access control
- Wheelchair / Disabled access control
- Material deliveries

Typical Installation Sites

- Corporate facilities
- Government facilities
- Health Clubs / Recreation Centers

Options

- Various available options, including:
- Clear panel or metal bar infill
- Non-locking and electric lock control models
- Magnetic gate status contact switch - provides notification when gate is open

Safe and User Friendly Operation

- Heavy duty hydraulic closure closes the gate smoothly without banging
- Wide opening width; kick plate for disabled users
- Electric version automatically unlocks to provide free egress upon loss of power

Electrical (VSGX Only)

Power Supply	110-240VAC, 50/60 Hz
Peak Consumption	250mA
Operational Voltage	VDC, 24/12/5

Access Control Integration

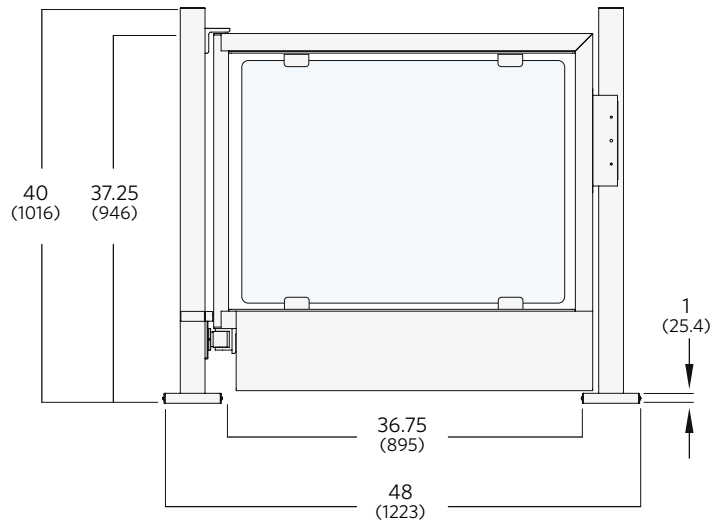

The electric locking version integrates easily with access control systems and push buttons via relay control.

Available Finishes

- #304 stainless steel with #4 satin finish
- Powder coat in various colors
